

Verona Software - systemaBACCO

The company that forever changed the way people work in the restaurant world

- **Verona Software group** is a group of companies composed of **35** highly qualified computer engineers with branches in **EUROPE** **Milano, Verona, Venezia, Rimini, Roma, Matera, Siracusa, Novigrad, Oradea, Helsinki, Hamburg, Lugano, Barcelona**, and recently in **SUD AMERICA** in **Santa Cruz in Bolivia and Lima in Perù**. We are continuously involved in research and development, information systems technology and technical assistance for the hospitality, restaurant and catering business. Our goal is the efficient optimization of your business and the reduction of management costs.
- The company has been founded in **1988** by **Mr. Gottardi** and is headquartered in Verona. Verona Software has a great knowledge in the development of software solutions and all its software applications can be installed in any computer **Windows** purchasable on the market.
- In the past years Verona Software Group has become **THE LEADING SOFTWARE HOUSE FOR HOSPITALITY AND RESTAURANT INDUSTRY MANAGEMENT IN ITALY**, thanks to its customers' suggestions and advices, and now outnumbers **4.200 installations in Italy and Europe**.

The setting of the whole system is CUSTOMIZED according to the TARGET BUSINESS. The hardware is composed of personal and handheld computers, linked by cabled or wireless networks, and by thermal printers at the cash desk or in different areas.

Our customers

- Our modular and expandable **HIGH TECHNOLOGY** systems, are developed for non expert users, and are personally customized for the specific needs of:

LUXURY RESTAURANTS
HOTEL RESTAURANTS
PIZZA RESTAURANTS
WINE CELLARS
BEER TAVERNS
ICE-CREAM BARS
TOURIST VILLAGES
ATTRACTION PARKS

- Our main customers are in the medium-high sector of this market, and are working with our self-developed management software which is now considered to be a **STANDARD REFERENCE MADE IN ITALY**.

Easy to use

- Our management software applications composing the suite **BACCO** have been tested for many years in a full **WINDOWS** operating system. Thanks to the **SQL SERVER database**, it is easy to manage several computers in the network. **BACCO** is available in the following **12 languages**: **Italian, English, French, German, Spanish, Portuguese, Danish, Finnish, Russian, Hungarian, Croatian and Romanian**.
- Our software applications can be installed using any computer, touch screen or printer. The system can also be used for common activities (office, home banking, internet, videogames, etc ...).
- Flat LCD color **SCREENS** with active **TOUCH SCREEN** technology are very user friendly. It's possible to store customer orders, charge bills and print the receipt at the cash desk just with a simple finger touch. **Courses, dishes, pizze and drinks may** be coded using **3 different languages**. The bill can be printed automatically in **2 different currencies**.

Wireless technology

BaccoMOBILE management software permits taking orders with the use of **pocket and tablet WI-FI**. This secure and efficient software enables transmitting and printing data automatically to printers in the various departments (Oven, Kitchen, Bar) even through walls, floors, people, terraces or any physical obstacle which could delay the service. **BaccoMOBILE** is perfect for time saving and allows to work with a small working staff.

Remote connection

Thanks to **INTERNET**, or **VPN** (virtual private networks), **BaccoTransfer** is able to copy or to move data from production systems to storage systems in your office, keeping production systems smaller and faster. **BaccoWebPortal** allows you to keep under control your business anytime and from anywhere, even without the need of a real system installation.

Customer service

Technical assistance is guaranteed by phone even after working hours by our assistance service. More than **20 technicians** are at our customers' disposal by phone even in the evening and during weekends.
